

PVC CARDS WITH WRITABLE BACK

Technical data & Specification

General Specification

Those cards have different surface on each side. On the front, in PVC, you can print with your card printer, and on the back, you can handwrite thanks to a special surface. Their even and flat surfaces ensure flawless moves under the print head (minimizing the risk of damage) and printouts with vivid colours and well-defined barcodes.

• **Type:** PVC Cards

• **Features:** C4522 Blank PVC Cards with writable back 20 MIL.

On the back there is a writing panel that allows you to sign or to write something directly on the cards.

Evolis PVC cards with writable back are compliant with ISO CR-80 standards and delivered in a dust-free sealed packaging to help you get a better print quality. The PVC cards with writable back are compliant with ISO CR-80 standards:

Length: 85.6 mm

Width: 54 mm

• **Storage Information:** Avoid dust, direct sunlight, high humidity and high temperatures. Do not place near solvent or other chemicals.

Compatibility

Tattoo², Pebble. Pack of 100 cards.

Advantages

As you can write directly on it, PVC card with writable back is an easy way to personalize your cards. In example, you can print your business cards on this kind of support and then write something to your interlocutor on the back.

Tested and validated by Evolis R& D and Quality departments, these consumables bring you printing quality and reliability.

Use Evolis High Trust[®] supplies to keep off defects and to benefit from high-quality printouts and at an optimal cost-per-card.

Evolis card printers + Evolis High Trust[®] consumables = the winning combination!
