

EVOLIS
HIGH TRUST[®]

Advanced consumables for quality printing

Storage Information

The quality of the consumables is essential for a good quality printing. For an optimized lifespan and use, they have to be handled and stored under specific conditions.

The following recommendations are the optimal storage conditions for best print quality.

These are based on our current know-how and observations but are not a warranty on the products.

General storage recommendations:

For all the Evolis supplies (color, monochrome or security ribbons, cards and cleaning kits) it is recommended to store them in dark place avoiding dust, direct sunlight, high humidity and high temperatures. These products must not be placed near solvent or other chemicals.

Ribbons :

Part Number	Description	Storage Time		Storage Temperature	Humidity
		If unopened	After opening		
COLOR RIBBONS					
R3011	5 Panel - YMCKO	1 year	3 months	0-25° C	50-70%
